

HAMILTON TOWNSHIP FIRE DEPARTMENT
Public Notice: Annual Fire Hydrant Flushing

October 26, 2026

To: All Hamilton Township Residents

Subject: Annual Fire Hydrant Flushing — October 26 through November 9, 2026

Dear Hamilton Township Residents,

Please be advised that the Hamilton Township Fire Department will be conducting its annual fire hydrant flushing program beginning **Monday, October 26, 2026, through Monday, November 9, 2026.**

This essential maintenance program is conducted to ensure that fire hydrants throughout the township remain in proper working conditions and are capable of providing adequate water flow for emergency fire protection.

During this period, residents may experience temporary water discoloration or a slight reduction in water pressure while hydrants are being flushed in their area. Although the water may appear discolored, this is generally temporary. If you experience discoloration, we recommend running your cold water tap for several minutes until the water clears. Residents are also encouraged to avoid doing laundry during or immediately after hydrant flushing in their area to prevent possible staining of clothing.

We appreciate your patience and understanding as our department performs this important preventative maintenance to help protect the safety and well-being of our community.

If you have any questions or concerns regarding the annual hydrant flushing program, please contact the Hamilton Township Fire Department.

Thank you for your continued cooperation and support.

Respectfully,

Hamilton Township Fire Department
Serving and Protecting Our Community
